Criterion 4 – Infrastructure and Learning Resources

4.1 Physical Facilities

4.1.2. The Institution has adequate facilities for cultural activities, sports, games (indoor, outdoor), gymnasium, yoga centre etc.

Cultural Activities

Culture, as a concept, is one of the most complex ideas in academic use today. It is defined and applied in various and often incompatible ways and is the site of significant disagreement between academic disciplines regarding the fundamental character of human social life and the manner in which it is to be studied. Culture tends to refer to symbolic systems of beliefs, values, and shared understandings that render the world meaningful and intelligible for a particular group of people. While these systems which provide the basis for such elementary concepts as food and kinship and even influence how individuals experience time, space, and other aspects of reality, often appear to their adherents as natural and objective, they in fact represent variable, socially agreed-upon models. In turn, humans must themselves construct these models in order to find order and meaning in a world lacking an inherent sense of either.

Ironically, just as the anthropological concept of culture has gained extraordinary momentum in popular use, as well as in areas such as law and political science, the concept has come under criticism from within the discipline of anthropology itself. Some anthropologists allege that the culture concept oversimplifies and stereotypes whole societies, erroneously treating them as isolated and uniform while underplaying individuality and diversity of opinion. Others maintain, however, that the concept has never entailed such assumptions, and that culture is simply a useful way to think about the beliefs and shared understandings that make it possible for humans to understand their world.

Students in Cultural activities

The Institution has adequate facilities for cultural activities, their specification about area/size is 165sq.m. And it was established in 2008. And all types of cultural activities going on throughout the year, and this cultural activities platform user rate is very high throughout the year, college conduct many cultural activities such as singing, bharatnatyam and etc., and this institution has won may first prizes in indoor and outdoor of the college premises.

Chebrolu Engineering College conducted may cultural activities such as like Arts & Health, Dancing and dance residencies, drawing, painting, and crafts, Music and singing, Photography and film, Poetry in Parks, Pottery and ceramics and Woodworking.

Sports and Games (Indoor and Outdoor)

Games and sports are very similar: A game is a physical or mental activity or contest that has rules and that people do for pleasure. A sport is a contest or game in which people do certain physical activities according to a specific set of rules and compete against each other. The difference is subtle. A game is any mental or physical activity with rules that is done for fun, such as physical activities like baseball and soccer, or board games such as chess and Monopoly, or card games, or electronic games (like apps), or video games. Sports are specific physical activities one can compete in such as baseball, soccer, football, field hockey, running, cycling, rock climbing, swimming, diving, race car driving, kayaking, or weight lifting. There are many more games and sports than what is listed here. Below are some examples of 'game' and 'sport' in sentences.
